in Mark II SNAP-LOCK heavy duty limit switches

WATER OIL AND DUSTPROOF OR FLAMEPROOF VERSIONS

Now **TWO ONLY REPLACEABLE UNITS IN THE ELECTRICAL SIDE**

There are only two assemblies in the electrical side of B.S.A. ACME SNAP-LOCK Mk. II limit switches: a moulded one-piece contact block and the contact arm. Interchangeable on all models they are designed for easy replacement. Service kits comprising these items, complete with holding nut and fixing screws, are supplied at moderate cost.

B.S.A. Acme Snap-Lock heavy duty limit switches have an established reputation for reliability under the most arduous conditions. Recently introduced Mark II versions retain proved features of their forerunners but incorporate refinements in design and manufacture principally to simplify servicing, provide complete interchangeability of assemblies, increase electrical resistance to earth and ensure lasting efficient sealing. Please ask for the Mark II catalogue.

it's what you don't see that makes Power Centre Trunking so durable

ELECTRICAL DIVISION

POWER CENTRE

Poor J.B., he's been hanging around for days. Never said a word to anyone. Doc says it's trunking problems. "He needs a tonic", he said. So Doc, who gets to the bottom of everyone's troubles, prescribed Power Centre, the people who make jig made trunking that's got a hidden coating of zinc which ensures long lasting protection. This P.C. treatment has re-vitalised J.B. Already, he's feeling on top of the world with the satisfaction of knowing he can cut installation costs by as much as 33⅓%.
J.B. is a different person now, thanks to Power Centre. What's more, he fully recommends a dose of P.C. to anyone who's suffering from trunking problems.

If you're in this unnecessary predicament, take the first step to satisfaction by sending for P.C.'s fully descriptive literature.
